

Translations by kitano-san.

You must not ride in a car with your shoes on

when you brake hard, you must not ride in a car with seat flat.

The light must not be on for long times if car's engine isn't running because it makes the the battery dead.

How to use transfer:

- **2H** - for normal drive
- **4H** - when you need pulling force
- **4L** - when you need much pulling force
- **4L** - when you need much motor traction

A/T TEMP light is on when the A/T oil temperature is high. You should stop the car at safe place until A/T TEMP light is off. (Kitano-san notes that this is an important warning)

This label just has japanese words for tire size, psi, ...
